

# EPIC

Egyptian Personal Image Classifier

# problem

Are you tired of running out of space on your phone due to a massive number of photos? You're not alone. 91% of iPhone users face this issue, and 22% of all smartphone users run out of space monthly. But don't worry! Our company has developed a revolutionary new app that solves this problem. Easily filter unwanted photos, eliminate duplicates, and group your photos automatically. Never miss capturing your precious moments again. Download our app today and see the difference for yourself!

## OUR COMPANY

Upgrade your image filtering game with lightning-fast precision and accuracy. Say goodbye to hours of sifting through irrelevant images and hello to the perfect shot at your fingertips. Our premium image filtering technology, powered by advanced deep learning models, keeps us ahead of the competition. Don't wait, because capturing new precious moments is worth every penny.

Full clarity with **EPIC**

# Features

## **View / share**

View your precious moments and share with loved ones

## **Group and classify**

Group related images together

## **Filter and delete**

Easily get rid of unwanted images

## **Identify and search**

Easily navigate through your pool of images to get the wanted ones

## THEM

Every competitor had a problem going from being available on only one platform, to limited sharing options, to limited classification options.

## US

- Only app the classify in arabic
- First app gallery customized for GenZ
- Better Accuracy
- Faster and easier GUI
- cross-platform

# Main competitors

01

## **Google Photos**

Most well known app gallery yet not the best classifier out there proven by test.

02

## **Piktures**

While well known for its GUI, it offers no advanced organizational options, and have no IOS version

03

## **A+ gallery**

World's top gallery, yet it offers ads and in-app purchase. The app also has no ios version

04

## **Apple photos**

Official ios gallery, however, it offer limited sharing options and no cross-platform service

# Current Progress & Future Plans

---

## Phase 1 (Finished)

Data Collection/Scraping, Idea Refinement

---

## Phase 2 (In-Progress)

Data Pre-Processing, Training A.I  
Model For Image Classification

---

## Phase 3 (Optimum Goal)

Implementation of GUI That Accurately  
Classifies/Groups of Relevant/Irrelevant Images

---

## Phase 4? (Future Plans)

Integration with Smart Home IoT To  
Provide Personalized Experience For  
Each Classified User
